<p>Description: On certain passenger vehicles, the air bag electronic control unit (ECU) is designed to sense and discriminate frontal impact events, command air bag and seat belt pretensioner deployments in a timely manner, and perform continuous diagnostics of the air bag system in the vehicle. Due to the possible insufficient sealing of the bottom of an electrolyte capacitor, it is possible for it to leak electrolyte within the air bag ECU. Also, in high humidity environments, the operation of the vehicle air conditioner can cause rapid cooling of the ECU, which in turn may cause the formation of condensation with the unit.</p> <p>If this moisture comes into contact with the electrolyte from the capacitor, it forms a highly conductive material that could create an electrical short circuit. This electrical short could trigger the air bags and seat belt pretensioners.</p> <p>Remedy: Dealers will install a new air bag ECU. This service will be performed free of charge.</p>			
04/04/2003		General Motors	Manufacturer Safety recall issued - NHTSA #02V308 - Recall #15012 - RECALL 15012 1995 900 AIRBAG ECM REPLACEMENT - Status: Remedy Available Locate an authorized General Motors dealer to obtain more information about this recall. - Learn more about this recall

CARFAX Glossary

Failed Emissions Inspection

The emissions check performed during a vehicle inspection indicated the vehicle was emitting more than allowable emissions standards and/or had missing or modified parts. Repeated failed emissions records can indicate engine problems and CARFAX recommends you have the vehicle inspected.

Federal Odometer Act

The Federal Odometer Act requires a seller to disclose the vehicle's mileage on the title when ownership is transferred. Congress enacted this Act to prohibit odometer tampering and to protect consumers from mileage fraud. Under this act, sellers must disclose any issues with the vehicle's odometer. These disclosures translate into the Exceed Mechanical Limits and Not Actual Mileage titles.

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Manufacturer Recall

Automobile manufacturers issue recall notices to inform owners of car defects that have come to the manufacturer's attention. Recalls also suggest improvements that can be made to improve the safety of a particular vehicle. Most manufacturer recalls can be repaired at no cost to you.

New Owner Reported

When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

Not Actual Mileage Title

When the seller certifies, under the Federal Odometer Act, that the odometer reading does not reflect the vehicle's actual mileage. This may occur because the odometer was tampered with, broken, or replaced.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.
