⊖ [Learn more about this recall](#)

Description: On certain passenger vehicles, if an owner changes their wheels/tires between summer and winter using a steel wheel in the winter and an alloy wheel in the summer, it is possible for rust and contamination to build up on the wheel hub during the steel wheel usage. If this occurs and the contamination is not removed, it is possible that after the tire change service, some of this contamination could flake or grind away resulting in reduced clamping force of the wheel to the hub. Over several seasons, it is possible that this reduced force could result in fractures developing in the wheel bolts due to wheel to hub movement. These fractures would result in wheel bolt breakage, allowing the wheel to detach from the wheel hub, increasing the risk of a crash.

Remedy: Owners will be contacted by mail and asked whether they change between steel and alloy wheels. If they do engage in this practice, they will be instructed to bring their cars to an authorized dealer. The dealer will remove the wheels, clean any contamination from the wheel and wheel hub, and replace the wheels using new improved bolts with attached washers. This service will be performed free of charge.

**Glossary****Failed Emissions Inspection**

The emissions check performed during a vehicle inspection indicated the vehicle was emitting more than allowable emissions standards and/or had missing or modified parts. Repeated failed emissions records can indicate engine problems and CARFAX recommends you have the vehicle inspected.

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Manufacturer Recall

Automobile manufacturers issue recall notices to inform vehicle owners of a safety defect or failure to meet minimum federal safety or emissions standards. Manufacturer recalls are repaired at no cost to the customer.

Mileage Inconsistency

If an odometer reading is less than a previous reading but CARFAX is uncertain whether the discrepancy is a rollback or a clerical error, then CARFAX calls it a "Mileage Inconsistency". In this case, you should verify the mileage with your dealer or a qualified mechanic.

New Owner Reported

When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.
